DOMESTIC BASE FACTORS REPORT

CONSISTS OF:

VOLUME I

- INTRODUCTION
- DOD OVERVIEW
- DOD/SERVICE SUMMARY
- INSTALLATIONS INDEX
- ARMY INSTALLATIONS
- NAVY INSTALLATIONS

VOLUME II

- AIR FORCE INSTALLATIONS
- MARINE CORPS INSTALLATIONS
- DEFENSE AGENCIES
- DOD INSTALLATION ENERGY CONSUMPTIONS AND COSTS
- APPENDICES

DOMESTIC BASE FACTORS REPORT

FY 1979

I. INTRODUCTION

The Senate Committee on Appropriations, in its Report No. 95-325, on the Department of Defense Appropriations Bill, 1978, to accompany H.R. 7933, required that the Department of Defense (DoD) develop and submit an annual report on all domestic military installations containing certain data and management indicators. An extract of the pertinent portion of the Committee Report is contained as Appendix 1 of this document. Subsequently, the Senate and House Conference Committee, in its Report No. 95-565 on the Department of Defense Appropriations Bill, 1978, H.R. 7933, endorsed the requirements of the Senate report with regard to this annual reporting requirement.

The DoD is pleased to submit the Domestic Basic Factors Report to the Congress in compliance with the requirements contained in the above referenced documents for the end of the indicated reporting year.

II. CONTENT AND ORGANIZATION

This report contains the required information for all military installations and activities in the Fifty States and Puerto Rico at which DoD military and civilian personnel are assigned and to which base operating support (BOS) resources are provided. In general, excluded are only government owned contractor operated industrial plants, installations which have been or are in the process of being closed and/or declared excessed and minor installations and facilities.

The installations are grouped by common mission categories based upon the DoD Installation Defense Planning and Programming Category (IDPPC) classification system. This system is depicted and explained in Appendix 2 at the back of this document. This

classification system, however, is unique to installation management and planning functions and should not be confused with the Defense Planning and Programming Category system used to develop the DoD annual budget and programs.

The report is organized by Military Service - Army, Navy, Air Force, Marine Corps and Defense Agencies - with the installation data contained under the applicable IDPPC for that Service or the Defense Agencies. It contains a DoD overview section which displays various installation data. The next section contains summaries of all the installation data for each Military Service and a DoD summary of all the installation data contained in the report. These summaries also include information on all installations of each Military Service and the total DoD which conduct any type of formal type school/training activity regardless of IDPPC. The definition of formal type school/training activity excludes division/unit schools.

Also included in the report are various data on DoD energy consumption and costs. The energy data is displayed by regions of the country based upon the Department of Commerce's Bureau of Census regional definition, since such compilations of energy are the most meaningful. A map of the United States depicting the regions of the country used for the energy factors is contained in the energy section of the report.

The individual installation displays and associated summary information consist of the following:

- Part I, A and B - General Installation Data
- Part II, A and B - Installation Population Data
- Part III, A, B, C and D - Selected Installation Management Indicators
- Part IV, A, B, C and D - Installation Training Activity Data (Formal Training Activities) and Management Indicators
- Part V, A, B, C and D - Combat Type Mission Data and Management Indicators

Each installation data column entry is ranked to indicate its order within the grouping. The ranking varies depending upon the significance of the data. In some cases, therefore, the number one ranked installation may be for the largest entry in that column. In other cases, the number one ranked installation may signify the smallest entry in the column. A perusal of the column data will quickly establish which ranking order applies.

Summary data for the total of each appropriate column is included at the end of the column listing. All summary data consists of:

Row 1 - Number selected. This entry signifies the number of installation data entries in the field being considered.

Row 2 - Present. This entry signifies the number of installation data entries contained in the column (i.e., column entries).

Row 3 - Missing. This entry indicates the number of installation data entries missing from the field being considered. The arithmetic sum of row 3 and row 2 equal the entry in row 1.

Row 4 - Sum. The arithmetic sum of the column entries present (i.e., row 2). Caution must be exercised in using this entry since it is only meaningful for the sum of the basic data and not for columns which contain factors. For the latter, the row 4 - sum entry is meaningless. To result in valid factors the sums of the basic data columns applicable to the factor are used since the use of sum of the factored columns for any computation would be illogical.

Row 5 - Max. This entry indicates the maximum value of the column entries.

Row 6 - Min. This entry indicates the minimum value of the column entries.

Row 7 - Average - The arithmetic average of the column entries. For columns containing factors, the average is computed based upon the averages of the basic data columns applicable to the factor.

Row 8 - Median - The median entry of the column under consideration.

Row 9 - Std. dev. - The standard deviation of the column entries.

Appendix 3 provides the explanation of the data contained in the 85 columns comprising Parts I through V of the installation data listings of the report.

III. BASE OPERATING SUPPORT (BOS) FUNCTIONS AND COST

In 1977, the Congress directed the DoD to establish a uniform definition for base operating support (BOS) functions and costs. The uniform definition of BOS has been developed and the Military Services were required to use it to provide the information on base operating support costs required for this report. The uniform definition of BOS follows:

DEFINITION OF BASE OPERATING SUPPORT (BOS) FUNCTIONS AND COSTS

1. Purpose

Base operating support functions have been defined in such a way that all overhead functions which do not directly contribute to the mission accomplishment of combat units and tenants on Department of Defense (DoD) installations, activities and facilities are classed as BOS. It must be appreciated that all DoD resources ultimately contribute to the Defense mission. Nevertheless, in order to identify those functions which the Department considers to be the overhead costs of its base structure, it was necessary to make a distinction. A common definition of BOS enables the Military Departments and Agencies to report consistent data on base operating support costs to the Secretary of Defense, the Congress, and other organizations, as required.

The uniform definition of BOS differs from the program element structure upon which the Five Year Defense Plan

(FYDP), the Defense Budget and other similar documents are based. Program elements reflect the way in which the DoD organizes and manages resources, and do not lend themselves to requirements of the Congress when reviewing BOS in total. The intent of establishing a uniform definition of BOS was not to change organizational arrangements to fit the definition, but the development of new functional categories within the current DoD financial system.

The uniform definition of BOS does not differentiate between fixed, semi-variable and variable costs. Therefore, financial reports based on the definition will not indicate potential savings, for example, from base realignments. Potential savings, therefore, can be determined only through case-by-case studies of specific base realignment proposals.

2. Definition

The term "base operating support costs" refers to resources used at DoD installations, activities and facilities to provide services so that operational units and tenants can pursue mission objectives free of unrelated responsibilities. The services listed below are considered BOS regardless of whether they are incurred by the installation commander; by an activity on an installation which is not part of the installation organization (medical, commissary, etc.); by a subinstallation; by a separate facility; or by activities controlled by a central authority. In addition, this definition of BOS applies regardless of whether or not the installation (or activity) commander is responsible for planning, programming, budgeting, expending and/or accounting for the costs involved in these services. In other words, these services are considered BOS regardless of what organizational entity is responsible for the funds, manpower, and equipment needed to perform the function.

The BOS services fall into four broad categories:

Facility services to maintain land, plant and equipment.

Administrative services to accomplish clerical functions and increase efficiency.

Specific services to consolidate common type functions, increase efficiency and to insure a safe and habitable work place.

Community support services to maintain morale, welfare, recreation and to provide programs associated with military life and required by law.

The resources include expenses for both military and civilian manpower and both direct and reimbursable appropriated funds (regardless of source), but exclude nonappropriated expenses which are not a cost to the Government. Appropriations/funds which pay for recurring costs are operation and maintenance, military personnel (active, Reserve and Guard), RDT&E, family housing, industrial funds and installation schools. Nonrecurring costs for facilities and equipment to perform base operating support functions are generally funded by military construction and procurement appropriations. The definition includes all family housing costs but excludes BAQ payments. Future refinements of the definition may consider changes such as these payments.

3. BOS Functional Categories

Each category of BOS service includes the following functional costs:

Facility Services:

Maintenance and Repair of all Real Property

- Buildings
- Other Facilities
- Pavements (roads, parking areas, etc.)
- Land (grounds)
- R.R. Trackage

Minor Construction (with other than military construction funds).

Operation of Utilities for all Real Property.

Other Engineering Support (excludes rentals, fire protection).

- Custodial Services
- Entomology Services
- Refuse Collection and Disposal
- Snow Removal and Ice Alleviation

Rental of all Real Property except payments for GSA controlled space (includes cost of lease and all utilities and services).

Standard Level User Charges (SLUC) paid for GSA controlled space.

Special user service charges paid for GSA controlled space (includes annual recurring and one time costs for alterations of space).

Land Management.

Support Groups/Units Assigned to these functions.*

Related Investment.**

Administrative Services:

Installation Headquarters Administration and
Command (including squadron level responsible
for Base Operations)

Installation Comptroller

- Accounting and finance

- Budget

- Management analysis/engineering

- Internal review

Installation ADP services

Installation Public Information Activities

Installation Legal

Installation Civilian Personnel Administration

Installation Military Personnel Administration

Installation Printing and Reproduction

Installation Safety

Installation Engineering Service

Support Groups/Units assigned to these functions*

Specific Services:

Installation Audio/Visual

Installation Supply Operations (retail only)

Installation Transportation Activities

Installation Procurement Operations

Installation Training (excludes troop training
and tactical exercises)

Fire Protection and Prevention

Installation Physical Security and Police Activities

Installation Communications
Laundry and Dry Cleaning (for troop support and
other appropriated fund activities)
Installation Airfield/Air Base Operations (control
tower, weather, flight services, etc.)
Installation Storage Activities
Maintenance of Installation Materiel (includes
maintenance of administrative aircraft, vehicles
and equipment but excludes maintenance of tactical
equipment, combat vehicles and mission aircraft)
Support Group/Units Assigned to these functions*
Related Investment**

Community Support Services (includes only appropriated
fund support)

Operation of Medical Clinics and Dispensaries
(excludes regional hospitals)
Operation of Dental Clinics (excludes regional
clinics)
Bachelor Housing Operations and Furnishings
(management; housing assignment; care of quarters;
provision, care, preservation and maintenance
of furnishings, etc.)
Retail Commissary Operations
Operations of Troop Issue Commissary for Subsistence
Installation Food Services
Family Housing (FHMA account less reimbursables
for other services/facilities already included,
i.e., utilities, maintenance and repair of
facilities, etc.)
Appropriated Fund Support for Installation Dependent
School Operations in U.S.

Morale, Welfare and Recreation Activities

- Clubs
- Messes
- Libraries
- Sports Activities and Operation of Recreational Facilities
- Craft Shops
- Radio
- Television
- Newspapers

Social Action Programs
Community Service Activities
Chaplain Activities
Bands

Support Groups/Units assigned to these functions*
Related Investment**

*Also includes resources used by groups/units assigned to specific BOS tasks on an ad hoc basis such as engineer/Red Horse/SeaBee units assigned to repair/construction facilities, roads, parking areas; etc., even if the work is classified a military unit training project.

**Investment costs include the total authorized construction program for each fiscal year, as well as expansion, extension, and renovation of facilities with military construction funds. Investment also includes the costs to procure equipment needed to perform the functions in each category of service.

IV. CAUTIONARY COMMENTS

The data contained in this report has been developed on a best-effort basis. While uniform definitions were provided to the personnel completing the basic installation data required to compile the report, this definition has not yet been incorporated into the day-to-day management of the Department of Defense. As a result, it was

not possible to utilize the existing DoD financial and accounting systems to identify this data. Nevertheless, because of the special efforts of the Services, the validity of the data should be significantly improved over prior years. However, because of the circumstances described above, it still is subject to many different individual and command interpretations. Caution should, therefore, be exercised in using this data in any but the most judicious way.

The DoD also believes that because of the above and different organizations, methods and procedures, comparisons of data between Military Services cannot and should not be accomplished, except perhaps in a few select areas. The Military Services simply operate too differently to make any such correlation meaningful.

It must be also pointed out that the uniform definition of BOS costs includes reimbursables to the reporting installations from other Military Services and other Federal Agencies as well as direct BOS costs incurred by tenants of each reporting activity. Accordingly, care must be exercised when reviewing costs, since any direct funding reductions based upon the costs included in this report could impact inequitably, with serious consequences, on the host Military Service.

Figure 1 consists of four bar charts arranged in a 2x2 grid. The top row shows the distribution of the number of children per woman for the year 1990, and the bottom row shows the distribution for the year 2000. The left column shows the distribution for the United States, and the right column shows the distribution for China. The x-axis represents the number of children (0 to 10), and the y-axis represents the percentage of women (0 to 2,000). The charts show that in 1990, the distribution of children per woman was skewed towards higher numbers (6-10) in both countries, while in 2000, the distribution shifted towards lower numbers (0-4).
